Senior Full Stack Developer

Organization

Syncore is a top provider of automated, integrated logistics solutions ranging from robust, automated pallet storage to fully automated goods-to-person systems using i.e. advanced AutoStore (robots), Geek+ (AMR) and Movu atlas pallet shuttle technology. Syncore has subsidiaries in Germany, The Netherlands, Poland and Austria. It is the Logistic Solutions division within the Royal Reesink group of companies. Royal Reesink is an international distributor and service provider with 2.600 employees and a yearly turnover of €1.4B, headquartered in the Netherlands.

LogiCS within Syncore

As an integrated logistic solutions provider, Syncore designs and delivers future-proof warehouse solutions combining a unique mix of innovative and state-of-the-art subsystems controlled by their in-house developed Warehouse Control System. The long lasting and strategic partnerships with the leading OEMs in this business in combination with the in-house developed software ensures the best-in-class solutions to almost every logistics challenge!

As a Senior Full Stack Developer, you will play a key role in the design, development and continuous improvement of Syncore's Warehouse Control System (WCS). You will work across both front-end and back-end technologies, translating complex logistics challenges into robust, scalable and user-friendly software solutions. Together with colleagues, customers and technology partners, you will contribute to the next generation of automated warehouse solutions.

In the role of Senior Full Stack Developer, you will report to the Manager Software, and your base location will be our office in Duiven.

Main tasks and responsibilities

- Design, develop and maintain high-quality full-stack applications using modern front-end and back-end technologies;
- Take ownership of software architecture, technical design and solution development;
- Develop and optimize software for warehouse control and material flow systems;
- Collaborate closely with project managers, service engineers and customers to translate business requirements into technical solutions;
- Review code, promote best practices and contribute to software quality and maintainability;
- Participate in testing, commissioning, troubleshooting and performance optimization;
- Support the continuous improvement of development processes, tools and standards;
- Contribute to DevOps activities, CI/CD pipelines and software deployment processes;
- Mentor and support less experienced developers where appropriate;
- Travel occasionally to customer sites for project implementation and technical support.

Competences & Qualifications

Required qualifications

- Bachelor's or Master's degree in Computer Science, Software Engineering or a related field;
- At least 5 years of professional software development experience;

•Strong experience with C# and .NET application development;
•Strong experience with React or similar front-end frameworks;
•Experience with Microsoft SQL Server and database design;
•Experience with Git-based source control and DevOps practices;
•Experience with REST APIs, system integrations and distributed applications;
•Strong analytical and problem-solving skills;
•Excellent communication skills in Dutch and English;
•Willing to travel and have a valid Category B driving licence driving license.

Preferred qualifications

•Experience with warehouse automation, logistics software or industrial control systems;
•Experience with CI/CD pipelines and Azure DevOps;
•Experience working in an Agile/Scrum environment;
•Experience with cloud-based solutions and modern software architecture principles.

What Syncore offers

•Working in a top segment with professional projects;
•The opportunity to work on business-critical software that controls highly automated warehouses across Europe;
•A highly skilled and collaborative software development team;
•Exposure to leading warehouse automation technologies including AutoStore, Geek+ and Movu;
•Opportunities to influence technical decisions and software architecture;
•Personal development and training opportunities.
•Plenty of room for your own input and a lot of freedom and independence;
•Attention to your performance, growth and personal development;
•A challenging position for 32 to 40 hours per week with a competitive and good salary that suits your knowledge and background;
•Mobile phone and laptop;
•Hybrid working and flexible working hours;
•27 vacation days and 13 ADV days based on a full-time employment contract.
